

Putting the Person at the Center: Integrating Plans for Long-Term Services and Supports and Health Care Delivery through Health Information Technology

David O'Hara, Ph.D

Joint meeting sponsored by the Office of the National
Coordinator for Health Information Technology and
the Administration for Community Living

October 16, 2014

Westchester Institute
for Human Development
Creating Better Futures

Emerging Cognitive Support Technologies:

A Key to Promoting Community Participation and Health for Individuals with Intellectual and Developmental Disabilities

Concern for man himself and his fate must always constitute the chief objective of all technological endeavors... in order that the creations of our minds shall be a blessing and not a curse to mankind.

Albert Einstein

The User Interface is the Key (Software)

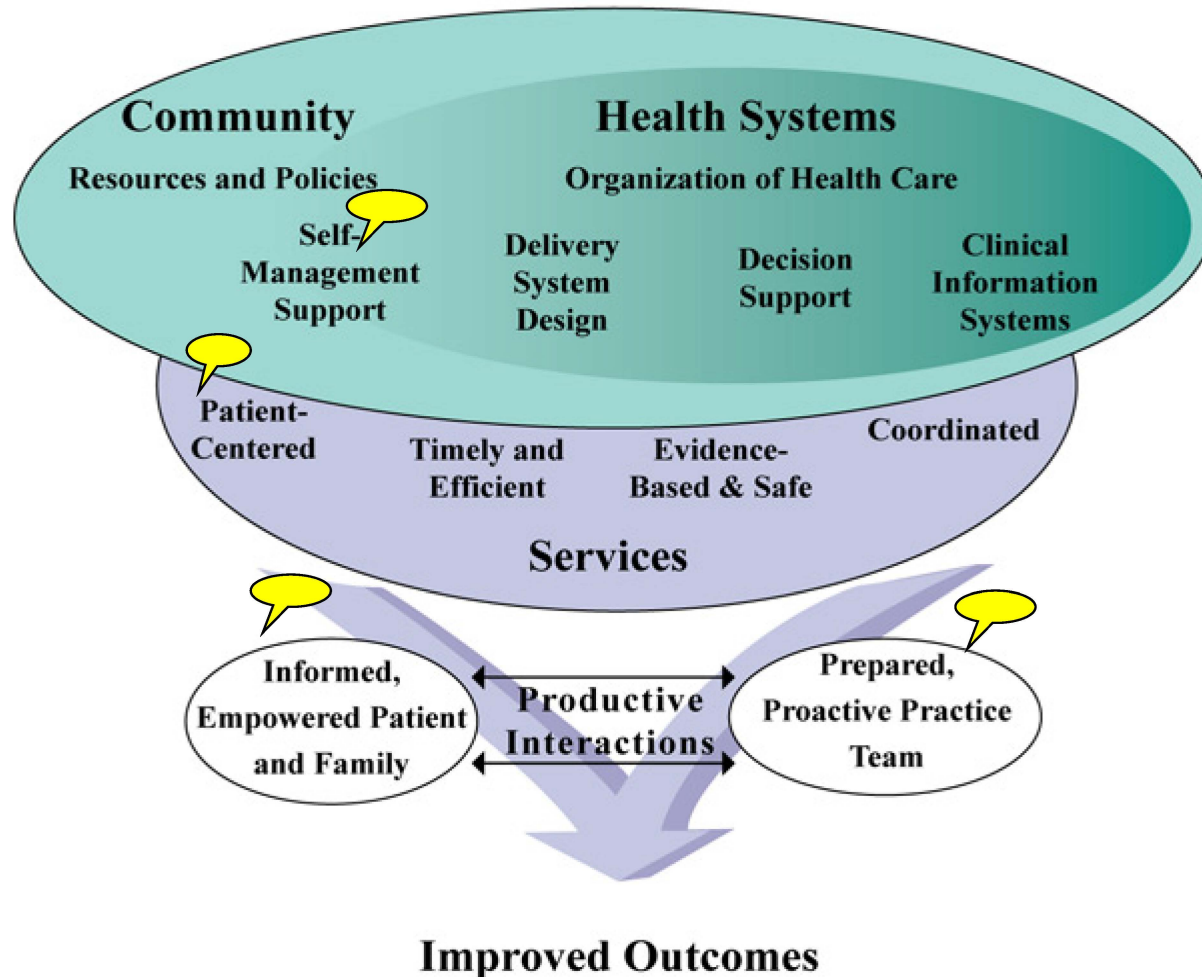

Type 2 Diabetes and People with I/DD

- Data from 2006 Medical Expenditures Panel Survey
 - Health status of working age adults with cognitive limitations compared with adults with no disability
Adults with I/DD significantly higher prevalence
19.4% vs 3.8%
 - Also significantly higher prevalence 6 other chronic health conditions
 - Adults with I/DD and diabetes significantly more likely to have 4 or more chronic illnesses

Reichard & Stolzle (June, 2011). Diabetes among adults with cognitive limitations compared to individuals with no cognitive disabilities. *Intellectual and Developmental Disabilities* 49 (3), p 141-154.

The Wagner Chronic Care Model

The Care Model

Health Literacy

- Institute of Medicine workshop reports:
 - Promoting health literacy to encourage prevention and wellness (November 1, 2011)
 - Research to find better pathways to improved health literacy and better health
 - Innovations in health literacy (March 10, 2011)
 - Health literacy and health disparities, better use of IT improve health literacy
 - Overall nearly nine out of 10 adults have difficulty using health information to make proper health decisions

Premature Deaths of People with Learning Disabilities

- **Data from a study between 2010 and 2012 in the UK**
 - Looked at the causes of death among all known deaths among people with learning disabilities in the Bristol area of south-west England
 - Men with learning disabilities died, on average, 13 years sooner than the general population
 - Women with learning disabilities died, on average 20 years sooner than the general population
 - Overall, 22% of the people with learning disabilities were under 50 at the time of death compared with just 9% of the general population
 - “The cause of their premature deaths appears to be because the NHS is not being provided equitably to everyone based on need. People with learning disabilities are struggling to have their illnesses investigated, diagnosed and treated to the same extent as other people.”

Heslop, et al, (March 19, 2013). Confidential inquiry into the premature deaths of people with learning disabilities. Norah Fry Research Center, Bristol University, England.

Improving Oral Health

Janice after
you eat
every meal
you need to
go brush
your teeth
and you
need to get
your brush
and your
toothpaste
and go to
the
bathroom

Self-Directed Consumer Surveys

Self-directed, survey tools , such as consumer satisfaction surveys, using multi-modal presentation and accessible design can increase independence and reduce staff time interviewing and entering/ aggregating data.

A Gateway to Self-Determination **The NTI Self-Determination Survey**

Where do you live?

-  **In my own house or apartment**
-  **At home with my family**
-  **In a group home or nursing home**

Back **Next**

Did you and the doctor
talk about things you
could do to stay
healthy?

 **Yes**

 **No**

14. Who picked the people that you live with?	People helped me pick them		
15. Who picked the people who help you at home?	People helped me pick them		
16. Who decides how you spend your free time?	People help me decide		
17. Who chose the place that you work, volunteer, or go to day program?	Someone else chose		
18. Who chose the people who help you at work, when you volunteer, or at your day program?	I do not have anyone helping me at work or when I volunteer		
19. Who decides what to buy with your spending money?	People help me decide		
20. Who decides your daily schedule, like when you get up, when you eat, and when you go to sleep?	People help me decide		
21. Who chose your case manager or service coordinator?			

The Future

2014-2015 - Health Information Technology Fellow

- one of 12 selected by the Office of the National Coordinator for Health Information Technology

Projects:

- Foundation grant submitted to evaluate the effectiveness of using smart technology to improve the oral health of people with I/DD.
- Joint planning grant: WIHD, University of Ulster and Trinity College, Dublin to modify the UK Type 2 Diabetes standard of care for use with smart technologies and people with IDD
- Proposal accepted by Special Olympics International to ensure full accessibility of their new EHR:
 - “Positioning for the Future: Intersecting Global Digital Health, Person-Centered Technology, and Health Promotion”
- Grant proposal with Cleveland Clinic to create a “virtual” consultation team to primary care physicians of adults with Down Syndrome

The Future

Projects:

- Develop and deploy accessible health education, health promotion and wellness resources through currently available EHR's
- Integrate direct response patient satisfaction survey into WIHD Patient-Centered Medical Home model of care
- Create Apps for use smart technologies to support transitions for young adults with I/DD from pediatric to adult health care
- Adapt UK NHS "simple" telehealth strategy so that it is accessible for people with IDD
- "Encourage" EHR vendors to explore integration of health and social care information and goals

Better
Futures*

People with Disabilities

Vulnerable Children

- ❖ Education and Training
- ❖ Innovative Services and Supports
- ❖ Community Training and Technical Assistance
- ❖ Research and Dissemination

Programs and Services

For People with I/DD

- ❖ Health Center
- ❖ Assistive Technology
- ❖ Speech and Hearing Center
- ❖ Behavioral Psychology
- ❖ Early Intervention
- ❖ Community Support

For Vulnerable Children

- ❖ Children's Advocacy Center (Child Abuse)
- ❖ Child Welfare Services

WIHD Health Services

Outpatient Health Center

- ❖ Primary Care (Internal Medicine and/or Family Practice)
- ❖ Specialty Care (Neurology, Endocrinology, Cardiology, ENT, GYN, Physiatry, Podiatry, Ophthalmology, Urology, Gastroenterology, Nutrition, Psychology)
- ❖ Psychiatry
- ❖ Behavioral Psychology
- ❖ Dentistry
- ❖ Dental Van
- ❖ Speech and Hearing Center
- ❖ Assistive Technology

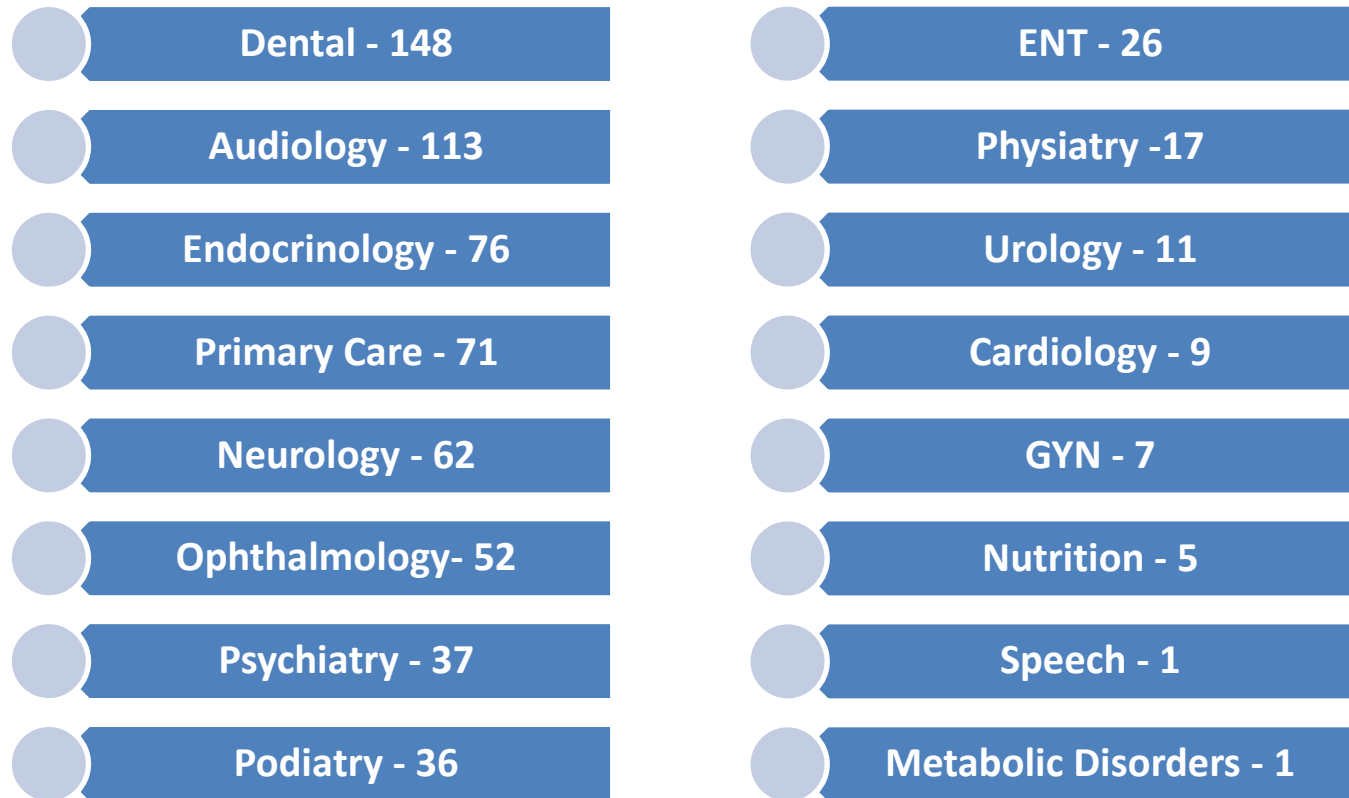

- 7,000 patients with I/DD
- 33,000 visits

Health Service Use: Profile of one community agency (2012)

- 176 individuals with I/DD
- 2219 visits in total
- 12.6 = Average visits/individual
- 47 different addresses

Same Community Agency: Services Used

Health Service Use of Individuals seen by Psychiatry (2012)

- 697 Individuals
- 5342 visits to psychiatry
- 7.7 = Average visits per patient

Other services utilized by these individuals
