Software Updates
UMLS Login Update

- UMLS has deprecated previous login libraries, now requiring an API key to verify user accounts

- Cypress requires UMLS account verification in order to access used valuesets. In Cypress v6.1.0, this is verified using the UMLS API Key from the UMLS Licensee Profile information page
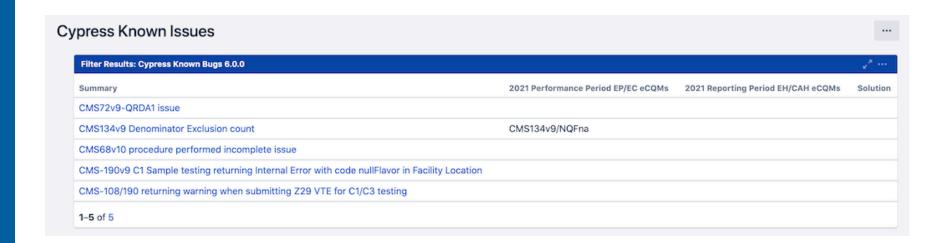

Software Updates
Cypress 6.1.1 Update

- **In the previous Cypress version, CVU+ calculations were not properly accounting for negated valuesets**
  - Caused by an update to save certain patient information during CVU+ calculations
  - Patient negation adjustments did not get appropriately saved
- **Cypress 6.1.1 update saves negation adjustments**
  - Released January 6, 2021
