Priority Uses Survey Results

| Topic | Rank |
|---|------|
| Orders & Results | 1 |
| Medication/Pharmacy Data | 2 |
| Evidence-Based Care for Common Chronic Conditions | 3 |
| Closed Loop Referrals | 4 |
| Other | 5 |
| Social Determinants of Health | 6 |
| Cost Transparency | 7 |

Other Suggestions

- A multi-use framework for advanced decision support handling several use cases [from the survey]
- Bi-directional patient communication (certification of allergies, meds, goals and priorities), correct record entries, restrict access for specific team members
- Net negotiated price transparency across the health care system
- Data access for VBC
- Interoperability uses of Admission, Discharge and Transfer files
- Interoperability of medical devices
- Free, real-time, patient data access to their medical information immediately following care

Proposed Approach for Discussing Priority Uses

- Orders & Results first – All of ISP Task Force will discuss
- Discussion will take place during the next 3 meetings:
 - » 9/11
 - » 9/25
 - » 10/9

ISP Task Force Charge

- **Overarching Charge:** To make recommendations on priority uses of health information technology and the associated standards and implementation specifications that support such uses.
- **Specific Charge:** The ISP Task Force will:
 1. Make recommendations on the following:
 - Priority uses of health IT (consistent with the Cures Act’s identified priorities);
 - The standards and implementation specifications that best support or may need to be developed for each identified priority; and
 - Subsequent steps for industry and government action.
 2. Publish a report summarizing its findings.
