

# Draft USCDI Version 7

**USCDI**  United States Core Data  
for Interoperability

Sara Armson

Health IT Specialist, Development Lead of USCDI

[sara.armson@hhs.gov](mailto:sara.armson@hhs.gov)

- Background: United States Core Data for Interoperability
- Draft USCDI Version 7: Development Overview
- What's New in Draft USCDI v7
- Questions & Discussion

# US Core Data for Interoperability (USCDI)

The minimum dataset of the health care delivery system

# Core Principles

Comprises a core set of data needed to **support patient care** and **facilitate patient access** using health IT

Establishes a consistent baseline of data for other use cases

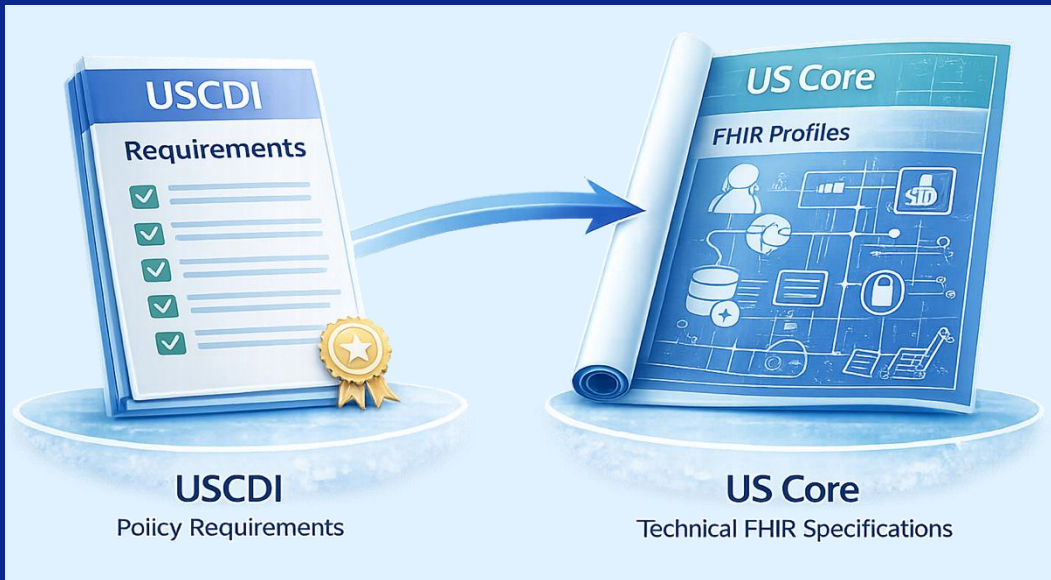

Expands over time via a predictable, transparent, and collaborative **public** process

# Why USCDI Matters

- ONC Cures Act Final Rule established USCDI v1 in 2020, and replaced the Common Clinical Data Set
- USCDI serves as the baseline data set for the ONC Certification Program
- USCDI also defines required data for other uses, such as CMS Patient Access and Payer-to-Payer API, TEFCA, and California Data Exchange Framework (v2)
- USCDI v5 was included in 2025 [Standards Version Advancement Process \(SVAP\)](#) standards
  - SVAP allows health IT developers to voluntarily update their products to newer versions of standards

[\\*Health Data, Technology, and Interoperability: Certification Program Updates, Algorithm Transparency, and Information Sharing](#)

# USCDI Data Elements Are Part of the Interoperability Ecosystem

Through certification requirements, ONC ensures that health IT developers build and maintain the technical capability to exchange USCDI data elements.

# Draft USCDI Version 7: Development Overview

# USCDI: Transparent, Predictable, Collaborative

- **USCDI v1** includes 52 data elements and is required by Cures Act Final Rule and added data classes clinical notes and provenance, and data elements pediatric vital signs and address
- **USCDI v3** expanded to 92 data elements and is required in HTI-1, effective January 1, 2026 (Note: Enforcement discretion until March 1, 2026)
- **USCDI v5** is included the 2025 SVAP Standards, released May 2025
- **Draft USCDI v7** includes 156 data elements, including 30 proposed additions, to advance interoperability, released in January 2026

The image shows a stack of five overlapping documents, each representing a version of the USCDI (Unified Shared Core Data Interoperability) standard. The documents are titled as follows from top to bottom:

- USCDI v1 Summary of Data Classes and Data Elements
- USCDI v2 Summary of Data Classes and Data Elements
- USCDI v3 Summary of Data Classes and Data Elements
- USCDI v4 Summary of Data Classes and Data Elements
- Draft USCDI v7 Summary of Data Classes and Data Elements

The v7 document is the most detailed and visible, showing a comprehensive list of data classes and elements. The classes listed include:

- Adverse Events**
- Facility Information**
- Immunizations**
- Family Health History**
- Goals and Preferences**
- Care Plans**
- Care Team Members**
- Clinical Notes**
- Clinical Tests**
- Diagnostic Imaging**
- Encounter Information**
- Health Status Assessments**
- Health Insurance Information**
- Interventions**
- Medications**
- Orders**
- Procedures**
- Provenance**
- Vital Signs**

Each class contains a list of specific data elements, such as Facility Identifier, Facility Type, Facility Name, Facility Address, Facility Telecom, Patient Goal, Treatment Intervention Preference, Care Experience Preference, Advance Directive Observation, Care Team Member Name, Care Team Member Identifier, Care Team Member Role, Care Team Member Location, Care Team Member Telecom, Healthcare Agent, Consultation Note, Discharge Summary Note, Emergency Department Note, History & Physical, Operative Note, Procedure Note, Progress Note, Referral Note, Clinical Test, Critical Test Result/Report, Diagnostic Imaging Test, Diagnostic Imaging Result/Report, Diagnostic Imaging Reference, Encounter Type, Encounter Identifier, Encounter Diagnosis, Encounter Time, Encounter Location, Encounter Disposition, Appointment, Adverse Event Outcome, Medication Allergy Intolerance, Drug Class Allergy Intolerance, Non-Medication Allergy Intolerance, Reaction, Allergy Intolerance Criticality, Assessment and Plan of Treatment, Care Plan, Care Team Member Name, Care Team Member Identifier, Care Team Member Role, Care Team Member Location, Care Team Member Telecom, Healthcare Agent, Consultation Note, Discharge Summary Note, Emergency Department Note, History & Physical, Operative Note, Procedure Note, Progress Note, Referral Note, Clinical Test, Critical Test Result/Report, Diagnostic Imaging Test, Diagnostic Imaging Result/Report, Diagnostic Imaging Reference, Encounter Type, Encounter Identifier, Encounter Diagnosis, Encounter Time, Encounter Location, Encounter Disposition, Appointment, Immunization Lot Number, Immunization Status, Immunization Record Source, Specimen Identifier, Specimen Type, Result Unit of Measure, Result Reference Range, Result Interpretation, Specimen Source Site, Specimen Collection Method, Unique Device Identifier, Device Type, Health Insurance Coverage Status, Health Insurance Coverage Period, Health Insurance Coverage Type, Relationship to Health Insurance Subscriber, Health Insurance Member Identifier, Health Insurance Subscriber Identifier, Health Insurance Group Identifier, Health Insurance Payer Identifier, Health Insurance Payer Identifier, Health Insurance Plan Identifier, Health Insurance Plan Identifier, Functional Status, Disability Status, Mental/Cognitive Status, Pregnancy Status, Alcohol Use, Substance Use, Physical Activity, SDOH Assessment, Tobacco Use, Nutrition Assessment, Integreler Needed, Current Address, Previous Address, Phone Number, Email Address, Related Person's Name, Relationship Type, Occupation, Occupation Industry, Accommodation, Deceased Indicator, Patient Identifier, Problem, Health Concern, Date of Onset, Date of Diagnosis, Date of Resolution, Condition Status, Procedure, Reason for Referral, Dose, Dose Unit of Measure, Route of Administration, Medication Dispense Status, Medication Dispense Status, Medication Instructions, Medication Adherence, Medication Administration, Medication Dispense Quantity, Medication Order, Laboratory Order, Diagnostic Imaging Order, Clinical Test Order, Procedure Order, Portable Medical Order, Medical Device Order, Nutrition Order, Referral Order, First Name, Last Name, Middle Name (including middle initial), Name Suffix, Previous Name, Date of Birth, Date of Death, Race, Ethnicity, Tribal Affiliation, Sex, Preferred Language, Systemic Blood Pressure, Diastolic Blood Pressure, Average Blood Pressure, Heart Rate, Respiratory Rate, Body Temperature, Body Height, Body Weight, Pulse Oximetry, Inhaled Oxygen Concentration, BMI Percentile (2 - 20 years), Weight-for-length Percentile (Birth - 24 Months), Head Occipital-frontal Circumference Percentile (Birth - 36 Months).

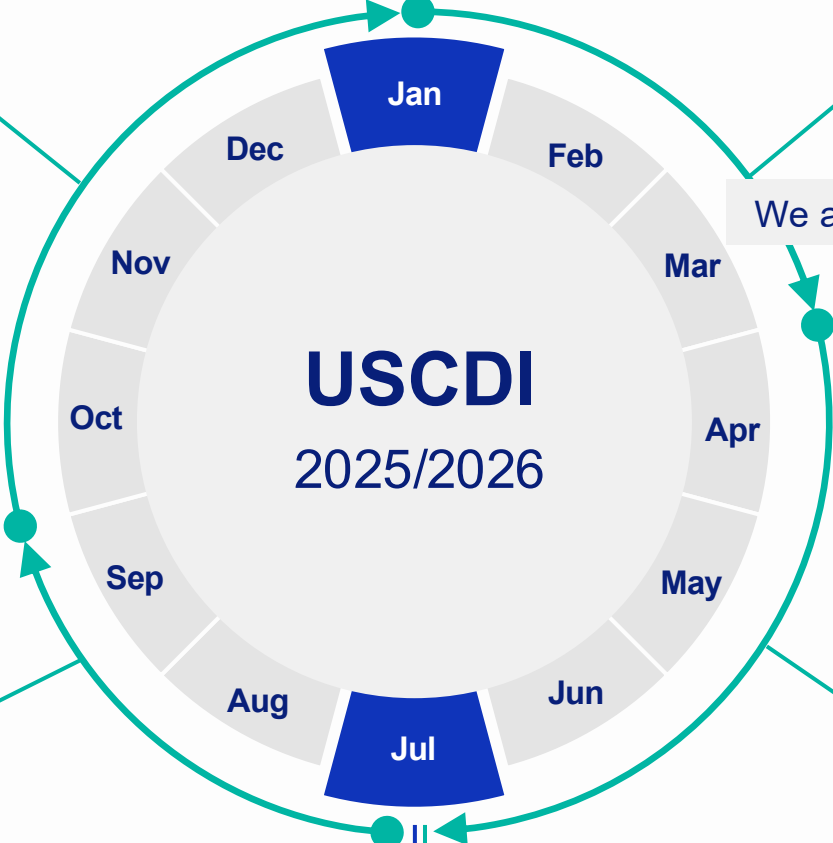

[\\*Health Data, Technology, and Interoperability: Patient Engagement, Information Sharing, and Public Health Interoperability Proposed Rule](#)

ONC Publishes **Draft USCDI v7**  
*Jan 2026*

Public feedback period on **Draft USCDI v7**  
*Jan – Apr 2026*

ONC prepares **Draft USCDI v7**  
*Sept 2025 – Jan 2026*

We are here 

ONC prepares **USCDI v7 (Final)**  
*Apr – Jul 2026*

Public submission period for **USCDI v7**  
*Jul – Sept 2025*

ONC publishes **USCDI v6**  
*July 2025*

ONC publishes **USCDI v7**  
*July 2026*

# New USCDI Data Elements: Where Do They Come From?

- Public Feedback – Submissions through ONDEC
- Technically mature & broadly applicable data elements
- USCDI+ Domains

# USCDI ONDEC Submission System

## USCDI ONDEC (ONC New Data Element and Class) Submission System

### How It Works

Search ONDEC for the same or similar data elements. You can connect with other submitters and collaborate to strengthen a submission by commenting on them rather than submitting a duplicate entry.

Search within USCDI  

**Step 1. Submit new data elements and classes.**

[Review Prep Sheet](#)

See questions and prepare content for your submission - updated to include more information on ASTP/ONC's evaluation of submissions

[Start My Submission](#)

Registered ISP users only - [login](#) or [create account here](#)

**Step 2. ONC evaluates and assigns a level to each data element depending on the overall value, maturity and challenges to implementation.**

• [Level 0](#) • [Level 1](#) • [Level 2](#)

[View Leveling Criteria](#)

**Step 3. ONC posts submitted data elements on the USCDI page by level.**

Submitters will have an opportunity to add or change information which could change its level determination.

Other stakeholders can review these submissions and contribute to their development through comments and collaboration with original submitters.

**Step 4. ONC will evaluate and consider new submissions for the next version of USCDI.**

**Step 5. ONC publishes an updated version of USCDI annually.**

# Level Criteria Language

## USCDI Data Element Leveling Criteria

[Return to ONDEC](#)

ONC evaluates all submissions and assigns a level based on four criteria.

- Level 2 data elements are most mature and are considered for future versions of USCDI.
- Level 1 and Level 0 determinations are used to identify areas of additional work needed to meet the criteria for a higher level and consideration for future versions of USCDI.

Submitters can provide updates with additional information to justify a higher level and consideration.

	Criterion #1 Maturity - Current Standards	Criterion #2 Maturity - Current Use	Criterion #3 Maturity - Current Exchange	Criterion #4 Use Case(s) - Breadth of Applicability
LEVEL 2	Data element is represented by a terminology standard or SDO-balloted technical specification or implementation guide.*	Data element is captured, stored, or accessed in multiple production EHRs or other HIT modules from more than one developer.	Data element is electronically exchanged between more than two production EHRs or other HIT modules of different developers using available interoperability standards.	Use cases apply to most care settings or specialties.
LEVEL 1	Data element is represented by a terminology standard or SDO-balloted technical specification or implementation guide.*	Data element is captured, stored, or accessed in at least one production EHR or HIT module.	Data element is electronically exchanged between two production EHRs or other HIT modules using available interoperability standards.	Use cases apply to several care settings or specialties.
LEVEL 0	Data element is not represented by a terminology standard or SDO-balloted technical specification or implementation guide.	Data element is captured, stored, or accessed in limited settings such as a pilot or proof of concept demonstration.	Data element is electronically exchanged in limited environments, such as connectathons or pilots.	Use cases apply to a limited number of care settings or specialties, or data element represents a specialization of other, more general data elements.

\*Maturity-Standard criterion is the same for Level 1 and Level 2. Data elements meeting this level of maturity will be assigned Level 2 for this criterion.

# United States Core Data Interoperability (USCDI)+

---

## Extending Beyond the USCDI

---

Unique program and use case-specific data needs are sometimes not fully met by USCDI.

---

ONC's USCDI+ initiative helps government and industry partners build on USCDI to support specific program needs.

---

Applies USCDI processes for submission and harmonization while focusing on programmatic priorities.

---

Seeks to leverage programs and authorities across HHS to drive adoption

# USCDI+ Initiatives

Impact

## Quality

Harmonized data for quality measurement and reporting.

Aligns with CMS eCQMs, HRSA UDS modernization, and FHIR-based reporting.

## Cancer

Real-world data for cancer care, trials, and registries.

Enhances trial matching, irAE tracking, and registry data collection.

## Behavioral Health

Data for mental health and substance use disorder programs.

Supports SAMHSA grantees, reduces reporting burden, improves data quality.

## Public Health

Data elements for case reporting, lab exchange, and situational awareness.

Supports CDC's OPHDST and public health interoperability across jurisdictions.

# USCDI+ Quality: Standardizing Digital Quality Measurement

---

## Purpose

- Establishes **standardized, interoperable data elements** for digital quality measurement and reporting, aligning federal and non-federal quality programs.

---

## Development Approach

- **Six Core Criteria:** Community Input • Readiness • Policy Alignment • Measure Relevance • Harmonization • Standards Alignment
- **Engagement for Draft V1:** 30+ commenters | 400+ comments

---

## Dual Release Structure

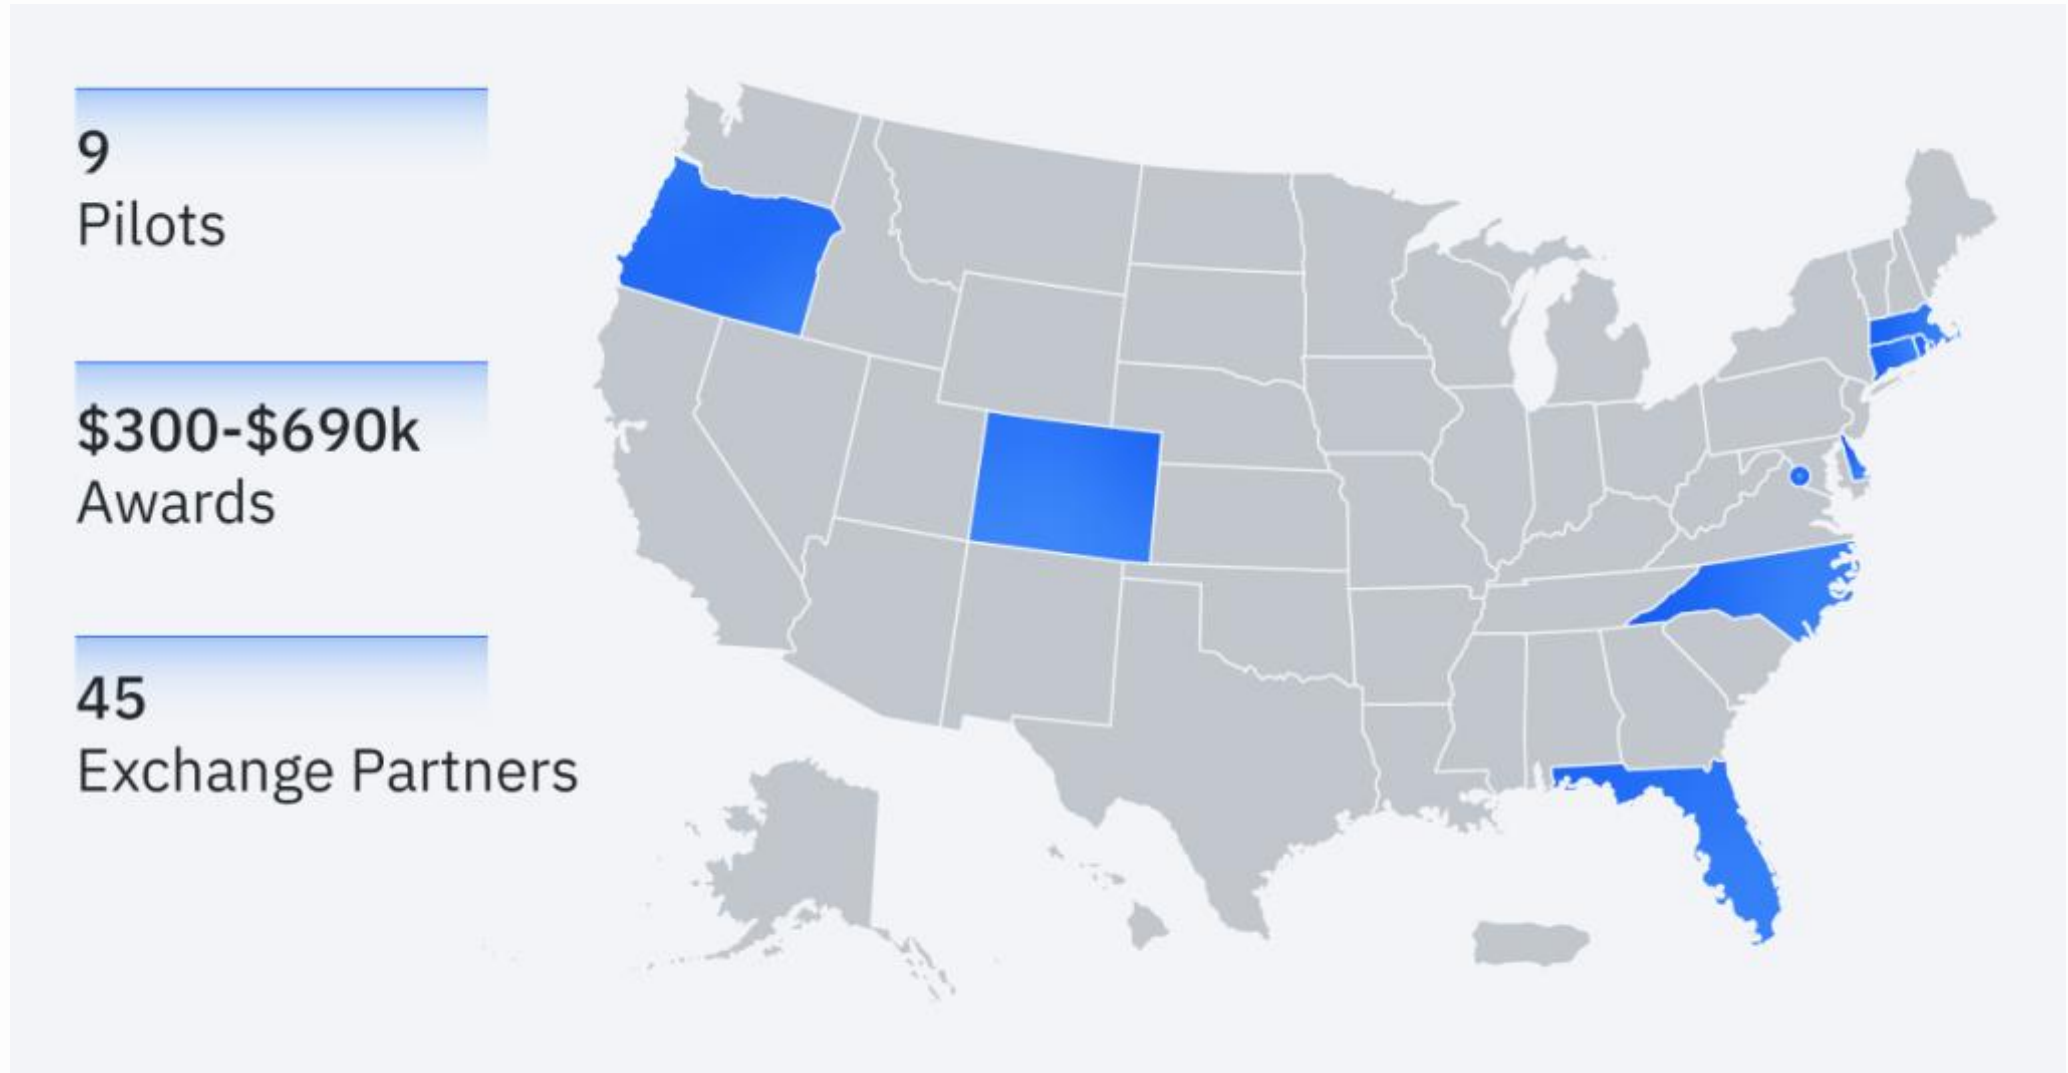

- **USCDI+ Quality V1 (Final):** Implementation-ready elements supporting eCQMs
- **Quality Overarching:** Strategic roadmap for future development

---

## Next Steps

- Federal partner coordination on implementation
- **Draft V2 open for comment until March 17, 2026**
- Ongoing evaluation of challenges and priorities

# USCDI+ Behavioral Health: New Pilot Projects Launched

# What's New in Draft USCDI v7

# Draft USCDI v7

## Adverse Events

- Adverse Event **NEW**
- Adverse Event Outcome **NEW**

## Allergies and Intolerances

- Medication Allergy Intolerance
- Drug Class Allergy Intolerance
- Non-Medication Allergy Intolerance
- Reaction
- Allergy Intolerance Criticality **NEW**

## Care Plans

- Assessment and Plan of Treatment
- Care Plan

## Care Team Members

- Care Team Member Name
- Care Team Member Identifier
- Care Team Member Role
- Care Team Member Location
- Care Team Member Telecom
- Healthcare Agent **NEW**

## Clinical Notes

- Consultation Note
- Discharge Summary Note
- Emergency Department Note
- History & Physical
- Operative Note
- Procedure Note
- Progress Note
- Referral Note **NEW**

## Clinical Tests

- Clinical Test
- Clinical Test Result/Report

## Diagnostic Imaging

- Diagnostic Imaging Test
- Diagnostic Imaging Result/Report
- Diagnostic Imaging Reference **NEW**

## Encounter Information

- Encounter Type
- Encounter Identifier
- Encounter Diagnosis
- Encounter Time
- Encounter Location
- Encounter Disposition
- Appointment **NEW**

## Facility Information

- Facility Identifier
- Facility Type
- Facility Name
- Facility Address
- Facility Telecom **NEW**

## Family Health History

- Family Health History

## Goals and Preferences

- Patient Goal
- Treatment Intervention Preference
- Care Experience Preference
- Advance Directive Observation

## Healthcare Information Attributes

- Diagnostic Report Date **NEW**
- Indication
- Performance Time
- Reason Not Performed **NEW**

## Health Insurance Information

- Health Insurance Coverage Status
- Health Insurance Coverage Type
- Relationship to Health Insurance Subscriber
- Health Insurance Member Identifier
- Health Insurance Subscriber Identifier
- Health Insurance Group Identifier
- Health Insurance Payer Identifier
- Health Insurance Coverage Period **NEW**
- Health Insurance Payer **NEW**

- Health Insurance Plan **NEW**
- Health Insurance Plan Identifier **NEW**

## Health Status Assessments

- Functional Status
- Disability Status
- Mental/Cognitive Status
- Pregnancy Status
- Alcohol Use
- Substance Use
- Physical Activity
- SDOH Assessment
- Tobacco Use **NEW**
- Nutrition Assessment **NEW**

## Immunizations

- Immunization
- Immunization Lot Number
- Immunization Status **NEW**
- Immunization Record Source **NEW**

## Laboratory

- Test
- Value/Result
- Specimen Type
- Result Status
- Result Unit of Measure
- Result Reference Range
- Result Interpretation
- Specimen Source Site
- Specimen Identifier
- Specimen Condition
- Specimen Collection Method **NEW**

## Medical Devices

- Unique Device Identifier
- Device Type **NEW**

## Medications

- Medication
- Dose
- Dose Unit of Measure

- Route of Administration
- Medication Dispense Status
- Medication Instructions
- Medication Adherence
- Medication Administration **NEW**
- Medication Dispense Quantity **NEW**

## Orders

- Medication Order
- Laboratory Order
- Diagnostic Imaging Order
- Clinical Test Order
- Procedure Order
- Portable Medical Order
- Medical Device Order **NEW**
- Nutrition Order **NEW**
- Referral Order **NEW**

## Patient Demographics/Information

- First Name
- Last Name
- Middle Name (Including middle initial)
- Name Suffix
- Previous Name
- Date of Birth
- Date of Death
- Race
- Ethnicity
- Tribal Affiliation
- Sex
- Preferred Language
- Interpreter Needed
- Current Address
- Previous Address
- Phone Number
- Phone Number Type
- Email Address
- Related Person's Name
- Relationship Type
- Occupation
- Occupation Industry

- Accommodation **NEW**
- Patient Identifier **NEW**
- Deceased Identifier **NEW**

## Problems

- Problem
- Health Concern
- Date of Onset
- Date of Diagnosis
- Date of Resolution
- Condition Status **NEW**

## Procedures

- Procedure
- Reason for Referral
- Procedure Status **NEW**

## Provenance

- Author
- Author Role
- Author Time Stamp
- Author Organization

## Vital Signs

- Systolic Blood Pressure
- Diastolic Blood Pressure
- Average Blood Pressure
- Heart Rate
- Respiratory Rate
- Body Temperature
- Body Height
- Body Weight
- Pulse Oximetry
- Inhaled Oxygen Concentration
- BMI Percentile (2 - 20 years)
- Weight-for-length Percentile (Birth - 24 Months)
- Head Occipital-frontal Circumference Percentile (Birth- 36 Months)

# Draft USCDI v7 – 30 Proposed New Data Elements

<b>New</b> Adverse Events	Allergies and Intolerances	Care Team Members
Adverse Event + Adverse Event Outcome	Allergy Intolerance Criticality	Healthcare Agent +
<b>Clinical Notes</b>	<b>Diagnostic Imaging</b>	<b>Encounter Information</b>
Referral Note	Diagnostic Imaging Reference +	Appointment
<b>Facility Information</b>	<b>New</b> Healthcare Information Attributes	<b>Health Insurance Information</b>

# Proposed Data Elements Adverse Events and Safety

---

## Allergy Intolerance Criticality

Estimate of the potential clinical harm, or seriousness, of a reaction to an identified substance.

---

## Reason Not Performed

Explanation or justification provided when an order or practice guideline is not carried out.

Usage note: Should be included with a procedure, immunization, and medication.

---

## New Data Class: Adverse Events

# New Data Class: Adverse Events

## Adverse Event

A change to patient condition that could be an unintended effect of clinical interventions.

- Standard: SNOMED

## Adverse Event Outcome

Result or impact of an adverse event.

Examples include but are not limited to hospitalized, recovered, recovered with sequelae, and death.

- Supports patient safety monitoring
- Enables quality improvement and reporting
- Improves awareness of prior adverse events across care settings

# Proposed Data Elements Care Coordination & Patient Context

---

## Appointment

A planned healthcare event for a future date/time.

Usage note: Created, tracked and managed for planned participation. An appointment may be called a future encounter and may result in one or more Encounters.

---

## Healthcare Agent

Individual legally authorized to make healthcare decisions on behalf of a patient.

---

## Accommodation

Modifications, tools, technologies, and other supports necessary to access care.

- Standard: SNOMED
- 

## Deceased Indicator

Indicates if the person is deceased or not.

# Care Coordination Across the Health Ecosystem

## Referral Order

Provider-authored request to another provider, specialist, or organization for care services.

Examples include but are not limited to referral orders to a wound care specialist and to a podiatrist.

## Referral Note

Narrative summary requesting an opinion advice or service from a clinician.

Examples include but are not limited to primary care referral to dermatology, dentistry, and acupuncture

- Standard: LOINC, At minimum: 57133-1

- Supports the referral workflow
- Reduced redundant communication
- Improved coordination across specialties and organizations

# Proposed Data Elements Clinical Care

---

## Medical Device Order

Provider-authored request for medical devices.

Examples include but are not limited to therapeutic footwear, insulin infusion pump, and continuous positive airway pressure (CPAP) machine.

---

## Specimen Collection Method

Technique or procedure used to obtain a specimen.

Examples include but are not limited to venipuncture, swab, biopsy, aspiration, and catheter collection.

---

## Medication Administration

Information about the event of a patient consuming or otherwise being given a medication.

Examples include but are not limited to swallowing a tablet, administering an injection, and a long running infusion.

---

## Nutrition Assessment

Assessment of a person's dietary intake.  
Standard: LOINC

---

## Nutrition Order

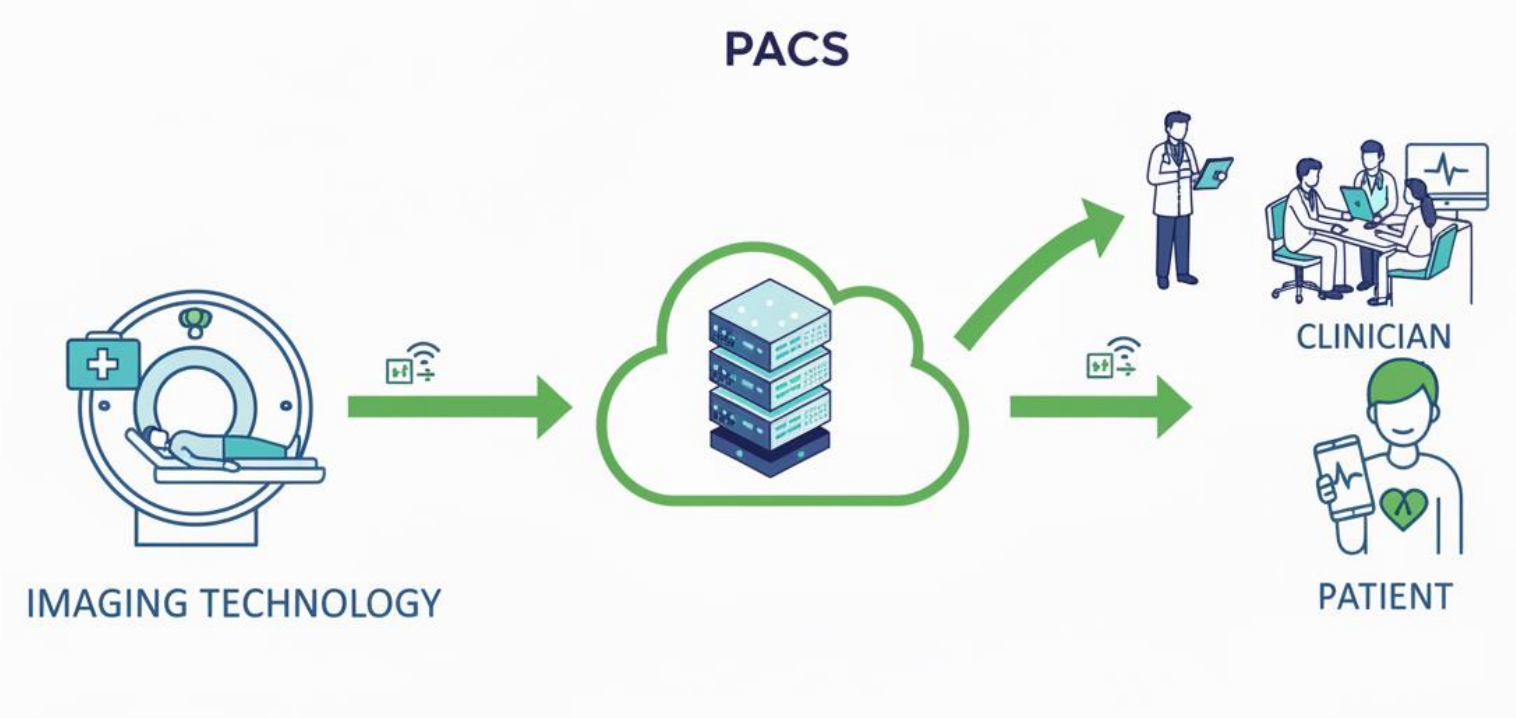

Provider-authored request for therapeutic diet, nutrition support, and nutrition to promote and maintain health.

Examples include but are not limited to cardiac diet, Mediterranean diet, whole food diet, clear liquid diet, enteral nutrition, and nutritional supplement.

# Diagnostic Imaging Reference

The information that can be used to access a diagnostic imaging study.

Examples include but are not limited to imaging study endpoint weblink, unique identifiers, and contextual information needed to retrieve a diagnostic imaging study.

# Tobacco Use

Assessment of a patient's tobacco product use behaviors. Tobacco products may include smokeless tobacco, cigarette tobacco, cigars, pipe tobacco, waterpipes (or hookah), nicotine pouches, nicotine gum, e-cigarettes, and other electronic nicotine delivery systems.

Examples include but are not limited to duration and frequency of use, mode of consumption, and type of product used.

Standard: LOINC, SNOMED CT

Expanded definition captures information about a patient's use of tobacco and nicotine products

## Revised

Aligns with FDA definition of tobacco use, including e-cigarettes, vaping devices, and smokeless tobacco

- ✓ Enables more complete risk assessment
- ✓ Supports targeted cessation interventions
- ✓ Improves public health surveillance of evolving product use

# New Data Class: Healthcare Information Attributes

---

## Reason Not Performed **NEW**

Explanation or justification provided when an order or practice guideline is not carried out.

Usage note: Should be included with a procedure, immunization, and medication.

---

## Indication

Sign, symptom, or medical condition that is the reason for a care activity.

Usage note: Indication may be included with a procedure, medication, and an order.

---

## Diagnostic Report Date **NEW**

Date and time a report containing test results or clinical interpretation was made available to providers.

---

## Performance Time

Time and/or date a care activity is performed.

Examples include but are not limited to vaccine and medication administration times, surgery start time, time ultrasound performed, and laboratory specimen collection time.

# Proposed Data Elements – Already supported in Certified HIT

13 proposed data elements are already supported in certified health IT

- These improvements can be realized with minimal additional implementation burden

<b>Facility Telecom</b>
<b>Diagnostic Report Date</b>
<b>Health Insurance Coverage Period</b>
<b>Health Insurance Payer</b>
<b>Health Insurance Plan</b>
<b>Health Insurance Plan Identifier</b>
<b>Immunization Status</b>

<b>Immunization Record Source</b>
<b>Device Type</b>
<b>Medication Dispense Quantity</b>
<b>Patient Identifier</b>
<b>Condition Status</b>
<b>Procedure Status</b>
